DETAILED ACTION

Allowable Subject Matter

1. Claims 21-23 are allowed.
2. The following is an examiner's statement of reasons for allowance:

A base station apparatus comprising: a downlink transmitter that transmits a first signal with a directivity directed to a mobile station apparatus and a second signal with directivity wider than that of the first signal; a receiver that receives a reception power ratio of the first signal to the second signal measured in the mobile station apparatus; a determiner that determines whether the directivity of the first signal should be changed based on a difference between a transmission power ratio of the first signal to the second signal and the reception power ratio; and a directivity controller that changes the directivity of the first signal based on a result of a determination by the determiner, wherein the determiner sets a third threshold greater than a first threshold, and if the difference between the reception power ratio and the transmission power ratio is greater than the third threshold, determines that a directivity shift of the first signal is large, and if the difference between the reception power ratio and the transmission power ratio is greater than the first threshold and smaller than the third threshold, determines that the directivity shift of the first signal is small.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
